direct all other inquiries to our customer service phone number.

Section I - Product Identification
A buffered solution of glutaraldehyde in alcohol and water.

Section II - Hazards Identification
Danger: Highly flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. No smoking. Keep
container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and
eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of
fire, use fire extinguishers approved for alcohol fires. Danger: May cause allergy or breathing difficulties if inhaled.

Safety Ratings

| Health: hazardous | Flammability: Extremely flammable liquid and vapor | Reactivity: None | Contact: Slight |

Recommended safety equipment: safety goggles, lab coat and proper gloves. Storage: Keep cool and away from sources
of ignition in a well ventilated area.

NFPA Ratings
Health = 2    Flammability = 4    Reactivity = 0

Potential Health Effects
The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is
similar to other aliphatic alcohols.

Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects
as ingestion. Irritating to respiratory tract. May cause asthma like symptoms in sensitive individuals.

Ingestion: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.

Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant
irritation and flaking. May cause skin irritation or aggravation of existing dermatitis. May cause temporary discoloration of
the skin.

Eye contact: Vapors may cause stinging sensation and tearing. Solution contact can cause corneal injury which can
cause visual impairment if not dealt with immediately.

Chronic Exposure: May be a sensitizer in some individuals.

Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols.
Preexisting eye, skin, and respiratory conditions may also be aggravated. May aggravate preexisting asthma and other
lung diseases.

SDS For Wavicide-06 Plus, page 1 of 3
Section IV - First Aid Measures

*Inhalation:* Remove from source of exposure and get medical attention for any breathing difficulty.

*Ingestion:* Do not induce vomiting. Drink large quantities of fluids and call a physician immediately. Get immediate medical attention even if symptoms improve.

*Skin Contact:* Remove contaminated clothing and wash affected area with soap and water. Get medical advice if irritation develops. Wash or discard contaminated clothing before reuse.

*Eye Contact:* Immediately flush thoroughly with running water for at least 15 minutes. Get immediate medical advice.

Section V - Fire Fighting Measures

*Flash point:* 17 °C (63 °F) TCC

*Flammable Limits (for ethanol):* LEL 3% UEL 19%

*Explosion:* Not Normally an explosion hazards.

*Fire Extinguishing Media:* Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.

*Special information:* Pyrolysis will release toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures

Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage

Store in a cool, well ventilated place. Store in a closed container, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection

*Airborne Exposure Limits:* See section III.

*Ventilation System:* Usually not required. When required, Refer to the ACGIH document, "Industrial Ventilation, a Manual of Recommended Practices" for details about ventilation.

*Personal Respirator:* Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.

*Skin protection:* Protective gloves are recommended as part of good laboratory practice.

*Eye Protection:* Laboratory safety goggles or similar products are recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

*Boiling Point:* 79 - 80 °C

*Vapor pressure (mm Hg):* 52 @ 20 °C

*Vapor Density (air = 1):* 2

*Appearance and Odor:* A clear colorless liquid with the characteristic odor of alcohol.

*Density:* 0.90 g/ml

*Evaporation Rate (Ethanol = 1):* 1

*Solubility:* Infinitely miscible with water

Section X - Stability and Reactivity

*Stability:* Stable.

*Hazardous Decomposition Products:* Nothing unusual.

*Hazardous polymerization:* Will not occur.

*Incompatibilities:* Oxidizers.

*Conditions to avoid:* Heat, flame and sources of ignition.

Section XI - Toxicological Information

Chronic consumption of ethanol is believed to be linked to liver disease, cancer and birth defects.

Section XII - Ecological Information

*Environmental Fate:* Biodegradable.

*Environmental Toxicity:* Glutaraldehyde may be toxic to fish.

Ethanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption. The half-life for ethanol in the atmosphere is one to ten days.

Section XIII - Disposal Considerations

Incineration at a licensed chemical disposal facility is the preferred disposal method. Local governments often restrict the amounts of alcohol and other flammable liquids that may be flushed down the drain. The usual rule is that the effluent exiting the building can't be flammable. Dispose of contents and container in accord with all applicable regulations.

Section XIV - Transportation Information

DOT Shipping name: Ethyl alcohol solution Hazard Class: 3 Packaging Group II

DOT Hazard Label: Flammable liquid DOT Identification Number: UN1170

Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2) and 173.150(C)].
