Medical Chemical Corp.
19430 Van Ness Ave.
Torrance, CA 90501
Customer Service: Phone (310)787-6800
FAX (310)787-4464
CHEMTREC Emergency Response Telephone Number: (800)424-9300
Note: The CHEMTREC phone number is only for emergencies involving spills, leaks, fire, exposure or accident. Please direct all other inquiries to our customer service phone number.

Section I - Product Identification
A solution of glycerin and a potassium soap in alcohol and water.

Section II - Hazards Identification
Warning: Flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. Keep container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of fire, use fire extinguishers approved for alcohol fires. Do not eat drink or smoke while using this product.

Safety Ratings

\[ \text{Health: Slight} \quad \text{Flammability: Highly flammable liquid and vapor} \quad \text{Reactivity: None} \quad \text{Contact: Slight} \]

Recommended safety equipment: safety goggles, lab coat and proper gloves
Storage: Keep cool, away from sources of ignition in a well ventilated area.
NFPA Ratings
\[ \text{Health} = 1 \quad \text{Flammability} = 3 \quad \text{Reactivity} = 0 \]

Potential Health Effects

Harmful if swallowed.
Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects as ingestion.
Ingestion: If swallowed, rinse mouth with water and call a poison center. Ingestion will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.
Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant irritation and flaking.
Eye contact: May be irritating.
Chronic Exposure: Unknown.
Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols. Preexisting eye, skin, and respiratory conditions may also be aggravated.

Section IV - First Aid Measures

Inhalation: Remove from source of exposure and get medical attention for any breathing difficulty.
Ingestion: Do not induce vomiting if patient is unconscious or extremely drowsy. Otherwise administer 2 glasses of water and induce vomiting. Get immediate medical attention even if symptoms improve.
Skin Contact: In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.
Eye Contact: In case of eye contact, flush with water and get medical attention if needed.
Section V - Fire Fighting Measures

Flash point: 28 °C (82 °F) TCC
Flammable Limits (for ethanol): LEL 3% UEL 19%
Explosion: Not Normally an explosion hazards.
Fire Extinguishing Media: Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.
Special information: Pyrolysis will release toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures
Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage
Store in a cool, well ventilated place. Store in a closed container, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection
Airborne Exposure Limits: See section III.
Ventilation System: Usually not required. When required, Refer to the ACGIH document, “Industrial Ventilation, a Manual of Recommended Practices” for details about ventilation.
Personal Respirator: Usually not required.
Skin protection: Protective gloves are not required but recommended as part of good laboratory practice.
Eye Protection: Laboratory safety goggles or similar products are not required but recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties
Boiling Point: 84 °C (183 °F)
Density: 0.97 g/ml
Vapor pressure (mm Hg): Unknown
Evaporation Rate (Water= 1): 1
Vapor Density (air = 1): Unknown
Solubility: Infinitely miscible with water
Appearance and Odor: A clear brown solution with the odor of lavender oil.

Section X - Stability and Reactivity
Stability: Freezes at low temperature.
Hazardous Decomposition Products: Nothing unusual.
Hazardous polymerization: Will not occur.
Incompatibilities: Oxidizers.
Conditions to avoid: heat, flame and sources of ignition.

Section XI - Toxicological Information
Chronic consumption of ethanol is believed to be linked to liver disease, cancer and birth defects.

Section XII - Ecological Information
Environmental Fate: Biodegradable.
Environmental Toxicity: None expected.
Ethanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption. The half-life for ethanol in the atmosphere is one to ten days.
Section XIII - Disposal Considerations

Incineration at a licensed chemical disposal facility is the preferred disposal method. Local governments often restrict the amounts of alcohol and other flammable liquids that may be flushed down the drain. The usual rule is that the effluent exiting the building can't be flammable. Dispose of contents and container in accord with all applicable regulations.

Section XIV - Transportation Information

DOT/IATA Shipping name: Ethanol Solution  
Hazard Class: 3  
Packaging Group III  
Hazard Label: Flammable liquid  
UN Identification Number: UN1170  

Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2), 173.150(C) and IATA Y341].
