Section I - Product Identification

Methyl alcohol, also known as methanol or wood alcohol. Contains a trace amount of FD&C violet #2.

Section II - Hazards Identification

Danger: Highly flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. No smoking. Keep container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of fire, use fire extinguishers approved for alcohol fires.

Safety Ratings

<table>
<thead>
<tr>
<th>Health: Hazardous</th>
<th>Flammability: Extremely flammable liquid and vapor</th>
<th>Reactivity: Slight</th>
<th>Contact: Slight</th>
</tr>
</thead>
</table>

Recommended safety equipment: safety goggles, lab coat and proper gloves

Storage: Keep cool, away from sources of ignition in a well ventilated area.

Potential Health Effects

The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is similar to other aliphatic alcohols.

Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects as ingestion.

Ingestion: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.

Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant irritation and flaking.

Eye contact: May be irritating

Chronic Exposure: Unknown

Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols. Preexisting eye, skin, and respiratory conditions may also be aggravated. Methanol has shown genetic toxicity in some animals.

Section IV - First Aid Measures

Inhalation: Remove from source of exposure and get medical attention for any breathing difficulty.

Ingestion: Do not induce vomiting if patient is unconscious or extremely drowsy. Otherwise, administer 2 glasses of water and induce vomiting. Get immediate medical attention even if symptoms improve.

Skin Contact: In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.

Eye Contact: In case of eye contact, flush with water for at least 15 minutes and get medical attention.
Section V - Fire Fighting Measures

Flash point: 15 °C (59 °F) TCC  
Flammable Limits: LEL: 6.0, UEL: 36.5  
Explosion: Not Normally an explosion hazard.  

Fire Extinguishing Media: Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.  
Special information: Pyrolysis will release toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures

Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage

Store in a cool, well ventilated place. Store in a closed container, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection

Airborne Exposure Limits: See section III.  

Ventilation System: Usually not required. When required, Refer to the ACGIH document, “Industrial Ventilation, a Manual of Recommended Practices” for details about ventilation.  

Personal Respirator: Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.  

Skin protection: Protective gloves are not required but recommended as part of good laboratory practice.  

Eye Protection: Laboratory safety goggles or similar products are not required but recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

Boiling Point: 64 °C (147 °F)  
Vapor pressure (mm Hg): 98 @ 19 °C  
Vapor Density (air = 1): 1.1  
Density: 0.789 g/ml  
Evaporation Rate (Ethanol = 1): 1  
Solubility: Infinitely miscible with water  
Appearance and Odor: A clear colorless liquid with the Characteristic odor of methyl alcohol.

Section X - Stability and Reactivity

Stability: Freezes at very low temperature.  

Hazardous Decomposition Products: Nothing unusual.  

Hazardous polymerization: Will not occur.  

Incompatibilities: Oxidizers.  

Conditions to avoid: heat, flame and sources of ignition.

Section XI - Toxicological Information

</tbody>
</table>

Section XII - Ecological Information

Environmental Fate: Biodegradable.  

Environmental Toxicity: None expected.  

Methanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption.

Section XIII - Disposal Considerations

The preferred disposal method is incineration at a licensed chemical disposal facility. Local governments often restrict the amounts of alcohols and other flammable liquids that may be flushed down the drain. The usual rule is that the effluent exiting the building can’t be flammable. Dispose of contents and container in accord with all applicable regulations.
Section XIV - Transportation Information
DOT Shipping name: Methyl alcohol Hazard Class: 3 Packaging Group II
DOT Hazard Label: Flammable liquid DOT Identification Number: UN1230
Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2) and 173.150(C)].
