Note: The CHEMTREC phone number is only for emergencies involving spills, leaks, fire, exposure or accident. Please direct all other inquiries to our customer service phone number.

Section I - Product Identification
An aqueous solution of basic fuchsin, phenol, reagent alcohol and DMSO.

Section II - Hazards Identification
Danger: Highly flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. No smoking. Keep container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of fire, use fire extinguishers approved for alcohol fires. Phenol is very toxic and the presence of DMSO may enhance the absorption of the other ingredients.

Safety Ratings
- **Health**: Hazardous
- **Flammability**: Flammable liquid and vapor
- **Reactivity**: Slight
- **Contact**: Slight

Recommended safety equipment: safety goggles, lab coat and proper gloves

Storage: Store in a well ventilated, cool place.

NFPA Ratings
- Health = 2
- Flammability = 3
- Reactivity = 1

Potential Health Effects
The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is similar to other solutions of phenol and aliphatic alcohols.

*Inhalation*: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects as ingestion.

*Ingestion*: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death. Phenol is very toxic and absorption may be enhanced by the presence of DMSO.

*Skin contact*: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant irritation and flaking. DMSO will enhance the absorption of any substance dissolved in it.

*Eye contact*: May be irritating

Chronic Exposure: Unknown

Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols. Preexisting eye, skin, and respiratory conditions may also be aggravated. Methanol has shown genetic toxicity in some animals.

SDS for Carbol Fuchsin, Kinyoun, page 1 of 3
Section IV - First Aid Measures

*Inhalation:* Remove from source of exposure and get medical attention for any breathing difficulty.

*Ingestion:* Do not induce vomiting. Get immediate medical attention even if symptoms improve.

*Skin Contact:* In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.

*Eye Contact:* In case of eye contact, flush with water for at least 15 minutes and get medical attention.

Section V - Fire Fighting Measures

*Flash point:* 33 °C (91 °F) TCC

*Flammable Limits (for ethanol):* LEL 3%  UEL 19%

*Explosion:* Not normally an explosion hazard.

*Fire Extinguishing Media:* Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.

*Special information:* Pyrolysis will release phenol and toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures

Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage

Store in a closed container in a cool, well ventilated place, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection

*Airborne Exposure Limits:* See section III.

*Ventilation System:* Usually not required. When required, Refer to the ACGIH document, “Industrial Ventilation, a Manual of Recommended Practices” for details about ventilation.

*Personal Respirator:* Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.

*Skin protection:* Protective gloves are recommended as part of good laboratory practice.

*Eye Protection:* Laboratory safety goggles or similar products are recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

*Boiling Point:* 95 °C

*Density:* 0.99 g/ml

*Evaporation Rate (Water = 1):* 1

*Vapor Density (air = 1):* 3.2

*Solubility:* Infinitely miscible with water

*Appearance and Odor:* A reddish purple solution with the characteristic odor of phenol.

Section X - Stability and Reactivity

*Stability:* Freezes at low temperature.

*Hazardous Decomposition Products:* Nothing unusual.

*Hazardous polymerization:* Will not occur.

*Incompatibilities:* Oxidizers.

*Conditions to avoid:* heat, flame and sources of ignition.

Section XI - Toxicological Information

Chronic consumption of ethanol is believed to be linked to liver disease, cancer and birth defects.

Section XII - Ecological Information

Environmental Fate: Reagent alcohol is biodegradable. Basic fuchsin, phenol and DMSO are probably not.

Environmental Toxicity: Unknown. Ethanol evaporates quickly and is not expected to bioaccumulate. The half-life for ethanol in the atmosphere is one to ten days.

Section XIII Disposal Considerations

Incerination at a licensed chemical disposal facility is the preferred disposal method. Local governments may restrict the amounts of flammable liquids that may be flushed down the drain. Dispose of contents and container in accord with all applicable regulations.

Section XIV - Transportation Information

DOT Shipping name: Ethyl alcohol solution  Hazard Class: 3  Packaging Group: III

DOT Hazard Label: Flammable liquid  DOT Identification Number: UN1170

Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2), 173.150(C) and IATA Y341].
