Medical Chemical Corp.
19430 Van Ness Ave.
Torrance, CA 90501
Customer Service: Phone (310)787-6800
FAX (310)787-4464
CHEMTREC Emergency Response Telephone Number: (800)424-9300
Note: The CHEMTREC phone number is only for emergencies involving spills, leaks, fire, exposure or accident. Please direct all other inquiries to our customer service phone number.

Section I - Product Identification
A solution of giemsa stain and glycerin in methanol.

Section II - Hazards Identification
anger: Highly flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. No smoking. Keep container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of fire, use fire extinguishers approved for alcohol fires.

Safety Ratings

Health: Hazardous
Flammability: Very flammable liquid and vapor
Reactivity: Slight
Contact: Slight

Recommended safety equipment: safety goggles, lab coat and proper gloves
Storage: Keep cool, away from sources of ignition in a well ventilated area.

NFPA Ratings
Health = 2
Flammability = 4
Reactivity = 1

Potential Health Effects
The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is similar to other aliphatic alcohols.
Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects as ingestion.
Ingestion: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.
Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant irritation and flaking.
Eye contact: May be irritating
Chronic Exposure: Unknown
Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols. Preexisting eye, skin, and respiratory conditions may also be aggravated. Methanol has shown genetic toxicity in some animals.

Section III - Composition/Information on Components

Section IV - First Aid Measures

Inhalation: Remove from source of exposure and get medical attention for any breathing difficulty.
Ingestion: Do not induce vomiting if patient is unconscious or extremely drowsy. Otherwise, administer 2 glasses of water and induce vomiting. Get immediate medical attention even if symptoms improve.
Skin Contact: In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.
Eye Contact: In case of eye contact, flush with water for at least 15 minutes and get medical attention.
Section V - Fire Fighting Measures

*Flash point:* 18°C (64°F) TCC  
*Flammable Limits:* LEL: 6.0, UEL: 36.5  
*Explosion:* Not Normally an explosion hazard.  
*Fire Extinguishing Media:* Alcohol type foam, carbon dioxide or dry chemical. Water is ineffective against alcohol fires but may be used to cool adjacent containers.  
*Special information:* Pyrolysis will release toxic oxides such as carbon monoxide.

Section VI - Accidental Release Measures

Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage

Store in a cool, well ventilated place. Store in a closed container, away from open flames or other sources of ignition.

Section VIII - Exposure Control/Personal Protection

*Airborne Exposure Limits:* See section III.  
*Ventilation System:* Usually not required. When required, Refer to the ACGIH document, “Industrial Ventilation, a Manual of Recommended Practices” for details about ventilation.  
*Personal Respirator:* Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.  
*Skin protection:* Protective gloves are recommended as part of good laboratory practice.  
*Eye Protection:* Laboratory safety goggles or similar products are not required but recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

*Boiling Point:* 78°C (172°F)  
*Density:* 1.07 g/ml  
*Vapor pressure (mm Hg):* 98 @ 20°C  
*Evaporation Rate (Methanol = 1):* 1  
*Vapor Density (air = 1):* 1.1  
*Solubility:* Mostly miscible with water  
*Appearance and Odor:* An opaque purple solution with the characteristic odor of methanol.

Section X - Stability and Reactivity

*Stability:* Freezes only at very low temperature.  
*Hazardous Decomposition Products:* Nothing unusual.  
*Hazardous polymerization:* Will not occur.  
*Incompatibilities:* Oxidizers.  
*Conditions to avoid:* heat, flame and sources of ignition.

Section XII - Ecological Information

*Environmental Fate:* Biodegradable  
*Environmental Toxicity:* None expected  
Methanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption.

Section XIII - Disposal Considerations

The preferred disposal method is incineration. Localities may restrict the amounts of alcohols that may be flushed down the drain. Dispose of contents and container in accord with all applicable regulations.
Section XIV - Transportation Information

DOT Shipping name: Methyl alcohol  
Hazard Class: 3  
Packaging Group: II  
DOT Hazard Label: Flammable liquid  
DOT Identification Number: UN1230

Bottles smaller than 32 Fl. Oz. are eligible to be shipped under ORM-D or limited quantity exemptions [49 CFR section 173.150(b)(2) and 173.150(C)].
