Section I - Product Identification
A solution of Safranin O in water and reagent alcohol.

Section II - Hazards Identification
Warning: Flammable liquid and vapor. Keep away from heat, sparks, open flames and hot surfaces. Keep container tightly closed. Use only non-sparking tools. Take precautions against static discharge. Wear protective clothes and eye protection. In case of skin contact immediately remove all contaminated clothing. Rinse with water or shower. In case of fire, use fire extinguishers approved for alcohol fires.

Safety Ratings

Recommended safety equipment: safety goggles, lab coat and proper gloves

Storage:
Keep cool, away from sources of ignition in a well ventilated area.

NFPA Ratings
Health = 2  Flammability = 3  Reactivity = 1

Potential Health Effects

The toxicology of this compound have not been completely examined. It is presumed that the toxicity of this item is similar to other aliphatic alcohols.

Inhalation: Alcohols are absorbed through the mucous membranes and will produce irritation as well as the same effects as ingestion.

Ingestion: Inhalation will produce CNS disturbance, dizziness, photophobia, headache, stupor, coma and death.

Skin contact: Alcohols are absorbed through the skin. Repeated contact causes defatting of the skin with resultant irritation and flaking.

Eye contact: May be irritating

Chronic Exposure: Unknown

Aggravation of preexisting conditions: Impaired kidney and liver function may be aggravated by exposure to alcohols. Preexisting eye, skin, and respiratory conditions may also be aggravated. Methanol has shown genetic toxicity in some animals.

Section IV - First Aid Measures

_Inhalation:_ Remove from source of exposure and get medical attention for any breathing difficulty.

_Ingestion:_ Do not induce vomiting if patient is unconscious or extremely drowsy. Otherwise, administer 2 glasses of water and induce vomiting. Get immediate medical attention even if symptoms improve.

_Skin Contact:_ In case of skin contact, remove contaminated clothing and flush with water. Wash affected area with soap and water. Get medical advice if irritation develops.

_Eye Contact:_ In case of eye contact, flush with water for at least 15 minutes and get medical attention.

Section V - Fire Fighting Measures

_Flash point:_ 36 °C (97 °F) TCC. Substances with less than 25% alcohol are classified as combustible liquids for DOT shipping purposes.

_Flammable Limits (for ethanol):_ LEL 3% UEL 19%

_Fire:_ Water is ineffective against alcohol fires but may be used to cool adjacent containers.

_Fire Extinguishing Media:_ Alcohol foam, carbon dioxide or dry chemical.

_Special information:_ Pyrolysis will release toxic carbon monoxide.

Section VI - Accidental Release Measures

 Remove all sources of ignition, absorb with a suitable absorbent (such as paper towels) and dispose.

Section VII - Handling and Storage

_Store in a cool, well ventilated place. Store in a closed container, away from open flames or other sources of ignition._

Section VIII - Exposure Control/Personal Protection

_Airborne Exposure Limits:_ See section III.

_Ventilation System:_ Usually not required. When required, Refer to the ACGIH document, "Industrial Ventilation, a Manual of Recommended Practices" for details about ventilation.

_Personal Respirator:_ Usually not required. In case of emergency, or when exposure levels are unknown, use a positive pressure, full face piece, air supplied respirator.

_Skin protection:_ Protective gloves are not required but recommended as part of good laboratory practice.

_Eye Protection:_ Laboratory safety goggles or similar products are not required but recommended as part of good laboratory practice.

Section IX - Physical and Chemical Properties

_Boiling Point:_ 87 °C

_Density:_ 0.98 g/ml

_Vapor pressure (mm Hg):_ 18 @ 20°C

_Evaporation Rate (water = 1):_ 1

_Vapor Density (air = 1):_ 1.5

_Solubility:_ Infinitely miscible with water

_Appearance and Odor:_ A dark red liquid with the Characteristic odor of alcohol.

Section X - Stability and Reactivity

_Stability:_ Freezes at low temperature.

_Hazardous Decomposition Products:_ Nothing unusual.

_Hazardous polymerization:_ Will not occur.

_Incompatibilities:_ Oxidizers.

_Conditions to avoid:_ heat, flame and sources of ignition.

Section XI - Toxicological Information

_Chronic consumption of ethanol is believed to be linked to liver disease, cancer and birth defects._

SDS for safranin O, 0.4% w/v, page 2 of 3
Section XII - Ecological Information

Environmental Fate: Biodegradable
Environmental Toxicity: None expected

Ethanol evaporates quickly and is not expected to bioaccumulate. The material is removed from the air by dry and liquid adsorption. The half-life for ethanol in the atmosphere is one to ten days.

Section XIII - Disposal Considerations

Incineration at a licensed chemical disposal facility is the preferred disposal method. Local governments often restrict the amounts of alcohol and other flammable liquids that may be flushed down drain. Dispose of contents and container in accord with all applicable regulations.

Section XIV - Transportation Information

Substances with less than 25% alcohol are classified as combustible liquids for shipping purposes.

DOT/IATA Shipping name: not regulated.
DOT/IATA Hazard Label: not applicable.
